

MAX WINFREY

Tech Rider :

The following is a list of the requirements for Max Winfrey's performance. Since most venues differ in size and setup, this list should be used as a simple guideline for the advance team as they prepare for the show. Every reasonable attempt will be made to adapt to the venue's limitations.

1. Stage Requirements

A stage that is raised a minimum of 2 feet is better for the audience view. It should have a clean surface and a performance area that is at least 12' x 12'. If there are items on stage during the show, these must be approved by Max.

2. Sound and Lighting

The venue should have adequate lighting and sound amplification for the size of the audience. A professional tech production team is preferred. The following is required:

- 1 wireless headset or lapel microphone, (Max will bring his in case it's needed)
- General lighting wash
- 1 sound technician available 1 hour before venue opens to the audience
